## La vie rêvée du Pangolin

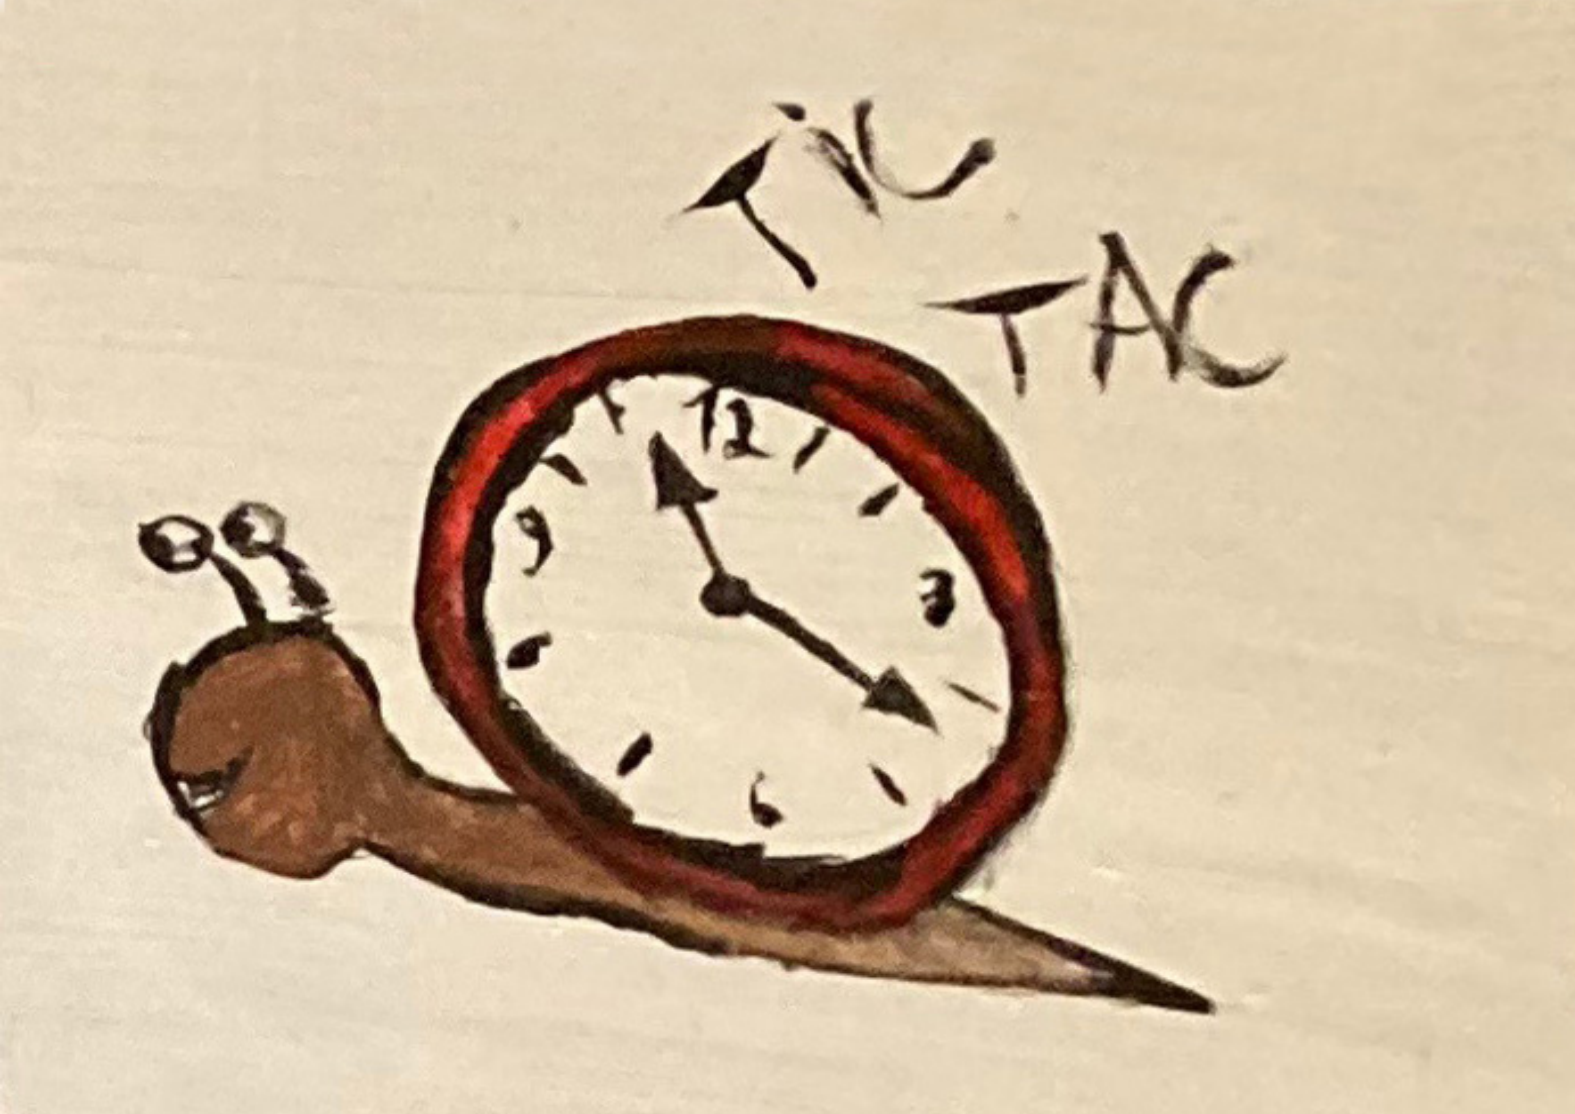

Pendant quelques semaines, une sculpture de pangolin a servi de support à l'expression et aux échanges entre participants autour des vécus et ressentis liés au confinement et déconfinement dans le contexte de l'épidémie du coronavirus.

A l'aide du support d'animation «**Et si on en parlait d'abord?**», réalisé par le CLPS-Bw, les participants ont été invités à exprimer leur vécu et leur ressenti sur cette période : mot, verbe, sensation de couleur, image sucitée... et à les transcrire en peinture pour devenir les écailles du pangolin.

Les illustrations de cet imagier sont les productions picturales résultants de ces ateliers.
